

Prize in Game Theory and Computer Science of the Game Theory Society in Honour of Ehud Kalai

The Prize was established in 2008 in recognition of Ehud Kalai's role in promoting the connection of the two research areas by an endowment of Yoav Shoham.

It is awarded to the person (or persons) who have published the best paper at the interface of game theory and computer science in the last decade. Preference is given to candidates of age 45 or less at the time of the award, but this is not an absolute constraint.

At the occasion of the Workshop on Computational Game Theory in Stony Brook, New York, USA, July 16–18, 2013, the Kalai Prize is awarded to

Benjamin Edelman, Michael Ostrovsky,
Michael Schwarz, and Hal R. Varian

for their papers

Benjamin Edelman, Michael Ostrovsky, and Michael Schwarz,
“Internet Advertising and the Generalized Second-Price Auction:
Selling Billions of Dollars Worth of Keywords,” *American Economic
Review* 97, pages 242–259, 2007,

and

Hal R. Varian, “Position Auctions,” *International Journal of Industrial
Organization* 25, pages 1163–1178, 2007,

for their fundamental analysis of Online Advertisement Auctions.

The Prize consists of a cash award of 2,500 US Dollars, plus travel expenses to attend the Workshop.

Roger B. Myerson

President of the Game Theory Society

The members of the Prize committee, appointed
by the President, were

Paul W. Goldberg, Kevin Leyton-Brown, Éva Tardos,
and Bernhard von Stengel.
